ZILLION

INTRODUCTION:

It is the year 2387. Mankind has relieved an overcrowded Earth by the establishment of planetary colonies in other star systems of the Milky Way galaxy. The most successful of these colonies is on Maris, a planet so Earthlike that many call it Earth II.

But now, the Marisians are in danger. The Noza, a savage warrior race from a distant star system have embarked upon a campaign of galactic domination and enslavement and the Marisian colony is their next target.

The Marisians know that their conventional weapons won't stop the Nozian horde and that their only hope of salvation is the Zillion weapons system. The Three Zillion guns appeared shortly after the colonists arrived on Maris. Their origin is unknown and their power source, the mysterious substance known as Zillion cannot be analyzed or reproduced.

But one thing is certain. The destructive power of the Zillion's molecular disruption beam is unlike anything known to man.
